

# EUROPEAN PRINCIPLES OF INHIBITOR MANAGEMENT\*

Approximately 30% of people with haemophilia A and 5% with haemophilia B develop inhibitors - currently the biggest complication in haemophilia care. The following 10 principles emphasize the importance and benefits of a centralized and multidisciplinary approach. Download the full original article for extended and more detailed information on [inhibitor.ehc.eu](http://inhibitor.ehc.eu) or scan the QR code!

- 1** AWARENESS OF INHIBITORS AND RISK FACTORS ACCROSS THE LIFE-SPAN
